DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the thermostat connections" in lines 3-4 of the claim.

There is insufficient antecedent basis for this limitation in the claim. Also, the connection between the timer and the thermostat is itself a thermostat connection that is being wired. To overcome this rejection, the Examiner suggests Applicant rewrite the claim such that this limitation reads "without the need for rewiring any *existing* thermostat connections."

Claim 3 recites the limitation "the fan switch" in line 2 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim 4 recites the limitation "the thermostat switch terminals" in lines 2-3 of the claim.

There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 1-19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art fails to teach a timer comprising the microprocessor/AC-DC converter/zero

crossing detector/switching means/user interface combination as recited in independent claim 1, and further wherein the timer connects directly to an existing thermostat without the need for rewiring any existing thermostat connections.
